AIRCRAFT BRAKES - FUEL PUMPS

RAPCO Fleet Support is now offering a NEW FAA PMA Weldon pump to replace Dukes pumps.

As an alternate to the below listed most popular Dukes overhauled fuel pumps, we can offer the NEW Weldon FAA/PMA approved fuel pumps at a much lower price.

PMA part number: 18000-A Replaces Dukes p/n 4140-00-17 (14VDC)
(Cessna p/n C291504-0101)

PMA part number: 18000-B Replaces Dukes p/n 4140-00-00-15 (28VDC)
(Cessna p/n C291504-0201)

These pumps are superior in performance and are a “drop in” replacement for the Dukes pump part numbers listed above. They are being sold on an OUTRIGHT basis. So there is no need to have your customer ship back their core.

These NEW fuel pumps are in stock and ready to ship. Please place your stocking order quickly, as we expect a high demand for these FAA/PMA approved pumps.
